NO SYMPTOMS OF UTI
• Don’t test or culture urine
• Don’t treat with antibiotics if the resident doesn’t have localizing signs/symptoms or warning signs
• Don’t treat with antibiotics even if urine culture is positive

ISOLATED NON-LOCALIZING SIGNS/SYMPTOMS
• Initiate active monitoring
• Don’t test or treat with antibiotics
• Consider testing and treatment with antibiotics if resident develops localizing urinary signs and symptoms

LOCALIZING SIGNS/SYMPTOMS
• Test if symptoms are severe or not resolving during observation
• Consider need for immediate antibiotic therapy and/or transfer to higher level of care if warning signs are present
